

Topic: Sub Queries

Note Use the below tables to perform the queries

FACULTY – fid , name , qualification

BATCH – bid , start_date , end_date , fid , cid , timing

COURSE – cid , cname , duration , fee

STUDENT – sid , sname , gender , doj , bid , cid

1. Write a query to display the details of those students who joined on the same date along with ASTHA.
2. Write a query to display the details of students who belong to the batches handled by the faculty whose qualification is MBA.
3. Write a query to display the details of the faculty members who did not take any batch in the last 3 months.
4. Write a query to display the details of batches which are handled by the faculty whose qualification is MS or if the course fee is more than 5000.
5. Write a query to display the details of students whose batch start date is '11-jan-13'.
6. Write a query to increase the course fee by 10% if more than 5 batches have started for that course.
7. Write a query to remove the batches where there are no students available.
8. Write a query to display the course name and fee for the fifth highest course fee.
9. Write a query to display the course names whose fee is more than any course whose duration is 30.
10. Write a query to create a table new_course from the existing course table of those courses whose duration is 45.
